# *Resume Writing: Tips and Strategies*

# Why is it important to write a good resume?

- Employers often have a large number of job applications to review, so they may only be able to spend a few minutes, or even a few seconds, scanning each resume
  - Due to this time limit, your resume should capture an employer's attention ***right away***
  - This means that the way you write your resume can have a ***large impact*** on the success of your job search
- 

# 5 aspects that should not be ignored

- Resume is the key piece of your job application
- Employers look at resumes for an average of only 6 or 7 seconds
- You will get the best results if you send your resume between 6 a.m. and 10 a.m. within the first four days of a job being posted
- Your resume should be clear, concise and *tailored* to the job which you are applying
- A strong resume can help you stand out from the crowd

# 10 resume writing tips to help you stand out

- 
- 
- 1 *Keep your resume short and direct*
  - 2 *Create an original resume template*
  - 3 *Highlight relevant skills and experiences*
  - 4 *Demonstrate results with numbers and metrics*
  - 5 *Craft a career snapshot*

# 10 resume writing tips to help you stand out

6 *Optimize your text*

7 *Think beyond your job duties*

8 *Use the right language to stand out*

9 *List your social media profiles*

10 *Check for errors*

# Keep your resume short and direct

- **No more than one page unless you have a very good reason for it to be longer**
  - Like an extensive career or a lot of highly applicable work experience
- **Include only recent and relevant experience**
  - It is not always necessary to include every detail from your entire career history
- **Avoid including too many unrelated work experiences**
  - It can draw attention away from your relevant qualifications

# Create an original resume template

- **Invest on originality**
  - More than 60% of hiring managers consider a customized resume as the top strategy for job applicants to increase their chance of landing a job
- **Format your resume so that it is easy to identify your qualifications**
  - For instance, if you advanced in a company quickly, draw attention to that growth
  - If you excessively job-hopped, bullet those jobs without providing specifics and detail more applicable positions

# Create an original resume template

- **Make sure the information is presented in a logical order when structuring a resume**
  - A hiring manager will read your resume starting at the top and ending at the bottom
  - However, if they do not finish reading the whole thing, you still want to ensure your strongest points come across

# Pick a resume template, fill it out, and format

# You can use an online resume builder

**Zety** (<https://www.zety.com>)

- It is one of the best website to build a resume online quickly and easily
- It offers multiple formats to download your resume as: PDF, Word, TXT, JPEG, and SVG

# Highlight relevant skills and experiences

- Prioritize the skills, qualifications and experiences that are directly applicable to the job
- Choose 3 or 4 former positions or experiences that best highlight the skills required for the position for which you apply
- If you do not have a work history that directly relates to the job you are applying for, draw on the skills you used and how your contributions benefited the organization or project

# Demonstrate results with numbers and metrics

- When you write about your previous work experience, quantify your successes with numbers
- Using metrics can highlight your achievements and give the hiring manager or recruiter a clear sense of how you impacted your previous place of employment

# Craft a career snapshot

- A **“career snapshot”** is a **brief summary at the top of your resume**
  - The summary is an opportunity to sum up your most relevant and important skills, experience, or assets ***immediately***
- Think of your career snapshot as an answer to the question **“How would you describe your work experience in one sentence?”**

# Craft a career snapshot

- With the career snapshot, you present a branding statement that briefly explains your ***unique value***
- This would then be followed by **a few bullet points that highlight your experience and your accomplishments**
  - Whatever you list here should be relevant to the position you are applying to
- Create a ***robust summary*** to capture the hiring manager's eye

# Optimize your text...

- Make sure you include **keywords** from the job post in your resume
  - You can copy and paste the job description into a word-cloud generator to identify the most frequently used terms, and make sure the terms that apply to you are used in your resume
  - You can also create a “core competencies” or “areas of expertise” section of your resume to list all of your hard and soft skills, and then reiterate those skills when you bullet your experience

# ...and keep it ATS-Compliant

- An **Applicant Tracking System** (ATS) is software application that scans resumes for relevant keywords
- If a company uses an ATS
  - It is possible that a recruiter may never even glance at any application that does not fit the job criteria that they have entered
- Hence, in order to pass the ATS scan
  - Make sure that your resume is formatted properly and includes the right words when describing skills, job titles, and educational background before submitting it

# Think beyond your job duties

- **Specific merits** are more engaging to read than just your experiences
  - Hiring managers do not want to read a list of your job duties, they want concrete examples of your accomplishments in previous positions that show how you can make a difference in this new position
  - For example, "I reduced operating expenses by 23% in six months" is far more interesting to an employer than "I have 30 years of sales experience."
- When deciding what information to keep or cut out of your resume, focus on striking abstract traits and qualifications in favor of **concrete and quantifiable results**

# Think beyond your job duties

- Employers want employees who get things done and who take great joy and pride in what they do
  - Rather than a laundry list of your qualifications, your resume should reflect your accomplishments and enthusiasm for your career
- Do not ignore the importance of your **skills section**
  - List any industry-relevant apps or programs you are familiar with and to find ways to incorporate examples of your emotional intelligence (e.g., self-awareness, empathy) and soft skills (e.g., work ethic, reliability) into your job description

# Use the right language to stand out

- Use strong action words, such as “achieved,” “designed,” “improved” and “established,” to describe your roles and projects
- Make sure to include details about how you improved a process or achieved a goal

# List your social media profiles

- Social profiles can be a powerful recruitment tool to supplement your experience and position as an expert in your field, **but** only if they are leveraged correctly

# List your social media profiles

- **If, and only if**, your social media accounts are filled with professional posts pertaining to your industry, listing them on your resume can be advantageous
  - They can show you have a strong network and are up to speed with modern-day marketing and communications practices
  - A recruiter may see that you like to keep up with what is happening and that you care about learning more
- If your social profiles are not professionally applicable, do not list them on your resume, and make sure they are set to private

# Check for errors

- Triple-check your own work and ensure it's 100% clean.

Pay also attention to:

- **Spelling, grammar and punctuation**
  - Make sure it is error-free and easy to read
- **Formatting**
  - Review formatting very closely, including font, alignment and spacing, related issues can often be perceived as a sign of lacking technical skills and/or attention to detail
- **Headings**
  - Do not submit an application addressed to the wrong employer or outline experience that is irrelevant to the role you are applying

# What to consider when writing a resume

- **Resume Formatting**
- **Contact Information**
- **Resume Summary**
- **Work Experience and Skills**
- **Resume With No Experience**
- **Education**
- **Extra sections**
- **Finishing Touches**

# Resume Formatting

- Choose a resume format that works for you
- Select an attractive and readable font
- Set your font size to 10-12 points
- Make strategic use of bold, caps, and italics
- Give your sections simple subheadings
- Frame your resume content using the correct margin size
- Align your content to the Left to make it easy to skim
- Balance your text and white space
- Do not worry about making your resume one page long
- Consider using a professionally designed template

# Contact Information

- Use a professional email address
- Make sure your contact information is up-to-date
- Include URLs to social media profiles, personal websites, and your blog

# Resume Summary

- Make good use of the top third of your resume
- Include a resume summary or objective

# Work Experience and Skills

- Only add jobs you have had in the past 10–15 years
- Remember all your jobs, eliminate those that do not matter
- Read the job description and find keywords
- Add achievements to your experience section
- Supply numbers and details wherever possible
- Add a link to your portfolio
- Draw attention to your promotions
- Reinforce your professional titles by showing career progression
- Write explanations for large gaps in your career history
- Tailor skills to the job description

# Resume With No Experience

- Offset with passion what you lack in experience
- Consider putting your education section first
- Describe your coursework

# Education

- Use reverse-chronological order
- Incorporate continuing education and online learning

# Extra sections

- Create additional sections
- Consider adding a hobbies and interests section to your resume

# Finishing Touches

- Proofread your resume
- Trim any unnecessary information from your resume
- Consider saving a copy of your resume as a PDF
- Name your resume file properly
- Match your cover letter to your resume
- Clean up your online presence
- Follow up
- Update your resume regularly

# Highlighting your strengths on resume: 5 useful tips

- 1 *Brainstorm & categorise*
- 2 *Research job vacancy*
- 3 *It's showtime*
- 4 *Enhance your statement*
- 5 *Proofread your masterpiece*

# Brainstorm & categorise

- Do a self-reflection and brainstorm your strengths beforehand before you start filling in your strengths on resume
- Your list of strengths would typically be made up of a combination of personal and professional strengths
  - Life experiences such as being disciplined and organised are also known as ***personal strengths***
  - Work experiences such as public speaking, negotiation, and being analytical are also known as ***professional strengths***

# Research job vacancy

- Carefully go through the requirements that the company is looking for when researching the job vacancies that you are planning to apply for
  - The better you understand what employers are looking for, the better you could craft your strengths on resume
  - Match their requirements and ensure that your profile matches the ideal talent they are looking for

# It's showtime

Once the research phase has been completed, it is time to put your strengths into writing:

- **Resume Objective**

- It serves as your formal opening statement and it helps employers to identify your skills and strengths immediately
- Include your strengths on resume when you are describing how your skills and experience can contribute to the company's success – your value proposition

- **Work Experience**

- When writing your job scopes, you should include your strengths, achievements and metrics that can better illustrate the awesome tasks you do on a daily basis

# Enhance your statement

- There are two main ways to enhance your statements on your resume: achievements and numbers
- In order to prove the strengths that you are going to include on resume, they must be backed up by achievements
- Your strengths on resume have to be relevant to your achievements as well as the keywords found in the job advertisement. You must be able to tie multiple items together in order to truly stand out from the crowd

# Proofread your masterpiece

- No matter how detail-oriented we may be, it is always good to proofread your resume and make sure that your strengths and their elaborations make sense

# Q & A Discussion

*Empower your digital vision*
